POINTS OF PERFORMANCE

Points of Performance, PoP, for a specific exercise should provide a complete picture of the exercise. To make this easy to read and easy to learn, it is based on a few general rules and a small set of pre-defined positions and body parts.

REP START	Defines how the athlete's body and external object must be to start a valid repetition.
REPEND	Defines how the athlete's body and external object must be to end a valid repetition.
REP REQUIREMENTS	Requirements that the athlete must achieve during the repetition in order for it to be valid. This may also restrict what the body and object may do during the repetition.
CYCLE & POST REP	Requirements for body and object after a valid repetition, and before the start of a new repetition.
MEASUREMENTS	Any measurements if applicable.
VALID OBJECT/EQUIPMENT	Defines which object(s) or equipment that can be used in accordance with the specific standard.
VARIATIONS	Lists any variations if applicable. See the variation overview of points to be added to the original PoP in order to meet the variation requirements.

COLOR REFERENCES

BLUE	Reference for POSITIONS within Definitions.
RED	Reference for BODY PARTS AND AREAS within Definitions.
GREEN	Reference for GENERAL RULES .
YELLOW	Reference for REP START and REP END within Point of Performance.

GENERAL RULES

- ADHERE TO INTENT** While a movement's definition is meant to be exact and complete, there might be cases where a literal interpretation of the written standard can be exploited to perform the movement in a way that was not intended. In such cases the Technical Official (TO) or Head Technical Official (HTO) will be able to no-rep such repetitions in real-time or after the test.
- AVOID CONTACT** Unless specifically stated the athlete and/or object may not rest or come in contact with:
- any surface (wall, ceiling, floor)
 - any equipment, bars, boxes, racks etc.
 - any objects not being the active object during a repetition
- The main exceptions not specified are shoes-to-floor on any ground movement and hands-to-rings/bar on any hanging movement as well as the active object's resting position (on ground, in rack etc.).
- PASSIVE ARM** Whenever there one or more passive arms, e.g. in one-arm movements or leg-movements, the passive arm(s) cannot be used to push or pull off the athlete's body or contact it in any way unless specifically stated in the standard. The arm(s) can however be swung in air to generate momentum or kept in air.
- HANG RULE** If object is in contact with the ground, including before the initial rep, a [deadlift lockout](#) must be achieved before the rep can be initiated.
- ALTERNATING RULE** An alternating execution of a task implies that the repetitions of the task must be completed by alternating left/right on the active hand or foot. After a good rep by the left side, a new repetition will not be counted on the left side before a good rep has been performed on the right. If the athlete is not able to perform the movement on both sides, he or she will not be able to complete the task.

UNBROKEN RULE

A set of repetitions must be performed without breaking, resting object on ground or resting outside of the normal movement pattern. If **rep start=rep end**, then there are no “in between” reps and rep requirements would count for the whole set.

Some definitions in this regard:

- Breaking equals letting go of external object or dismounting from bar/rings.
- Resting on ground is anything more than a touch-and-go fraction of a second contact.
- Resting outside of normal movement pattern is going into a position that normally one would not and that is clearly done for the recovery purpose. E.g. putting the bar on the back of the neck (not front-rack) during a set of thrusters.

LINE POSITIONING

Whenever a standard requires the athlete to be in contact with the ground on one side of a line, this means that not only must the athlete be in contact with the ground as stated, but no other part of the athlete may be in contact with the actual line or the area on the other side of the line.

Parts of the athlete’s body may be above the line or on the incorrect side of the line as long as these parts are in the air and not in contact with the ground. E.g. an athlete may jump over a finish line while having his hands in the air behind the line.

WEIGHT VEST

If a weight vest is required for a task, it must be worn tight enough so that the vest can be pulled away no greater than two fingers depth from the chest. An athlete who chooses to adjust vest tightness while mid-task may be required to show the TO that the vest adjustment conforms to the above standard before continuing with further task work.

VISIBILITY AT SPEED

Unless specifically stated in the standard, all **rep start, rep end** and other positions may be achieved in speed and with momentum. Still, it is the athlete’s responsibility to perform the movement clearly for the TO.

DEFINITIONS, BODY PARTS & AREAS

CHEST

- Area on torso including the clavicle and down to and including upper abs

SHOULDERS

- Area on torso including the actual shoulders and down to and including clavicle

ABS

- Area on torso including sternum and down to and including hipbones

TOES

- Area on the shoe also known as "toe box" - typically up until the laces start
- Includes top, bottom and any sides of the shoe in this area

HANDS

- **Positioning:** Entire hand with full palm and all fingers
- **Gripping:** Any part of the hand, full or partial

FRONT RACK

- Area including **chest** and **shoulders**

BACK RACK

- Area from neck and down to lower shoulder blades

OVERHEAD

- Area above the top of the head of the athlete. Can be slightly above, or way above
- In front, directly over, or behind the center of head

KNEES

- The joint between the thighs and the lower leg

ELBOWS

- The joint between the humerus (upper arm) and the radius and ulna (forearm)

LEG

- Entire lower limb of the human body, including the foot, thigh and even the hips and gluteal region

HIP

- The joint between the femur and the hip bone

FOOT

- The terminal joint of the leg, below the ankle joint

DEFINITIONS, POSITIONS

STANDING FREE

- Both feet in contact with the ground.

BOTTOM OF SQUAT

- **Standing free** (2-foot version) or 1 foot in the ground
- Achieving a full squat, with the crease of the hip below the plane of the top of the knee for each active leg.

POWER POSITION

- **Standing free.**
- Avoiding bottom-of-squat, this includes:
 - a partial squat
 - a full extension (also known as "muscle position")
 - a split position

STANDING TALL

- **Standing free** position is achieved.
- Full extension of the hips and knees.
- **Chest** up, straight back.
- Vertical alignment of the **shoulders**, hips, knees and ankles.
- Inside of heels no wider than outer plane of the shoulders.

DEADLIFT LOCKOUT

- **Standing tall** position is achieved.
- Object is supported by the **hands**, arms oriented downward from the **shoulders**.
- Elbows fully extended.
- **Shoulders** behind the vertical plane of the object if object is kept in front of body.

HANG POSITION

- **Standing free.**
- Object off ground (not touching ground with any part of the object).
- Object is supported by the **hands**, arms oriented downward from the **shoulders**.
- Avoid **standing tall** to ensure object is slightly lower than a **deadlift lockout**.

FRONT RACK LOCKOUT

- **Standing tall** position is achieved.
- Object in contact with the athlete's **shoulder(s)**.
- Elbow(s) clearly in front of the center of mass of the object.
- Fist(s) below chin.

OVERHEAD LOCKOUT

- **Standing tall** position is achieved.
- Object is **overhead** and over the sagittal midline of the body.
- The shoulder angle is open or rearward of the frontal plane.
- Full extension of elbows.
- For 1-arm versions, the supporting arm is vertical.

VERTICAL HANG

- Hanging vertically from a suspended bar or rings using both **hands**.
- Full extension of elbows.
- The shoulder angle is open or rearward of the frontal plane.

VERTICAL INVERSION

- Inverted (upside - down) position.
- Only the ventral part of the **hands** in contact with the ground.
- Full extension of the hips, knees and elbows.
- Vertical alignment of the **shoulders**, hips, knees and ankles.

VERTICAL SUPPORT

- Fully supported on **hands** above equipment (typically horizontal bar or rings).
- Elbows fully extended.
- **Chest** up, straight back.
- Bodyweight is not supported with any body parts other than the **hands** (e.g. resting trunk on the bar).

PLANK LOCKOUT

- Resting on the ventral part of the **hands** and **toes**.
- No other body parts are in contact with the ground.
- Arms and legs fully extended.
- **Shoulders**, hips, and feet in alignment.

PRONE

- Generally flat on the ground, not arching.
- Resting on the ventral part of the **hands**.
- **Hands** positioned behind the line made by the chin.
- **Chest** and **toes** in contact with the ground.
- **Leg, knee**, face or any other body-part contact is permitted, but not required.

SPLIT

- **Standing free**
- The entire front **foot** must be placed further in front than the **toes** of the back **foot**. Both feet must move away from each other.

SEATED

- Gluteus in contact with ground or starting object.

L-POSITION

- "L"-shape 90-degree angle at the hip.
- Forming an L-position horizontal legs, and heels at or above glutes.

PLANK LOCKOUT

- Resting on the ventral part of the **hands** and **toes**.
- No other body parts are in contact with the ground.
- Arms and **legs** fully extended.
- **Shoulders, hips**, and **feet** in alignment.
- **Toes** no greater than **shoulder** width apart.

DEFINITIONS, OBJECT ON GROUND

BARBELL

- Both bumpers in contact with the ground at the same time.

DUMBBELL

- Both sides on a single dumbbell in contact with the ground at the same time.

KETTLEBELL

- Any part of the bottom circle of a kettlebell in contact with the ground.

BALL

- Any part of the ball in contact with the ground.

ODD OBJECT

- Any part of the object in contact with the ground.

STANDARDS, CATEGORICALLY SORTED

AIRSQUAT-ID1.01

Athlete, without any external load, squats down below parallel and returns to standing.

REP START

- [Standing tall.](#)

REP END

- [Standing tall.](#)

REP REQUIREMENT

- Achieve the [bottom of squat.](#)

STRICT - ID V.12

Category: Execution

REP START

- **Repstart** cannot be achieved with any momentum, neither from previous rep or as a result of initial swing, kip or other movement.

REP END

- None

REP REQUIREMENT

- Knees, hips, trunk, shoulders and elbows must stay fully extended throughout the full rep unless it is the active part of the movement.
- Any additional contraction, swing, kip, knee jerk or other movement to generate momentum is prohibited
- The hip angle must be 120 to 180 degrees (bar muscle-up, ring muscle-up).

VALID OBJECT / EQUIPMENT

- None

VALID MOVEMENTS

REP START

- None

REP END

- None

REP REQUIREMENT

- Heels must remain above glutes
- May not use feet, thighs or any part of the body other than the ends to support the body or assist in any way
- Legs may not straddle the rope

VALID OBJECT / EQUIPMENT

- None

VALID MOVEMENTS

ID 11.01 – Rope climb

L-SIT - ID V.19

Athlete has all body weight on hands while torso held in a forward- leaning orientation, with legs held horizontally creating an "L" shape.

REP START

- Athlete supported on **hands**.
- Hips bent, forming an L-shape.

REP END

- Athlete supported on **hands**.
- Hips bent, forming an L-shape.

REP REQUIREMENT

- Legs must remain over vertical target.
- Feet must remain beyond horizontal target.

CYCLE & POST REP

- Continuous segments: **rep end** is a valid new **rep start**.
- Otherwise: the athlete may return to **rep start** in any controlled manner.

MEASUREMENTS

- Vertical target: standard same as top of parallelles
- Horizontal target: at athlete ankle when legs are fully extended.

VALID OBJECT / EQUIPMENT

- Parallelles

L-HANG - ID V.20

Athlete hanging from object with legs held horizontally creating an “L”-shape.

REP START

- Athlete hanging from **hands**.
- Hips bent, forming an L-shape.

REP END

- Athlete hanging from **hands**.
- Hips bent, forming an L-shape.

REP REQUIREMENT

- Legs must remain over vertical target.
- Feet must remain beyond horizontal target.

CYCLE & POST REP

- Continuous segments: **rep end** is a valid new **rep start**.
- Otherwise: the athlete may return to **rep start** in any controlled manner.

MEASUREMENTS

- Vertical Target: standard set so athletes legs must be held at a 90 degree angle with the body
- Horizontal target: at athlete ankle when legs are fully extended.

VALID OBJECT / EQUIPMENT

- Horizontal bar
- Rings
