Tier 1 and Tier 2 Country Definitions

Tier 1 Countries are the 10 countries with the highest Country Score (Defined Below) from the prior competitive season (i.e. 2025 Worlds and 2025 Continental Results determine Country tiers for 2026).

Tier 2 Countries are all other iF3 National Federation Countries.

Country Score

A country’s Country Score is way of quantifying a country’s performance across the iF3 season. The performance of a country can be calculated by summing the total points of their top athletes in a given event.

Only iF3 Worlds and iF3 Continental Championships are used in calculating the Country Score

The Country Score is determined by using Top 3 calculation. Each country earns points based on the performances of their top 3 point scorers across all individual Senior and Team divisions in given event.

Note on Team Competitions: Points earned by team athletes in a competition can only be used once in the country score. For example, a first place team at Worlds can add 560 points to their country score and then must use two athletes not on the team to earn additional points toward their country score. They may not use 560 + 560 + 560 representing 3 different athletes on the team.

Country Scores are re-calculated annually.

2025 Country Scores were determined using only results from Worlds 2024.
